LITEPAPER

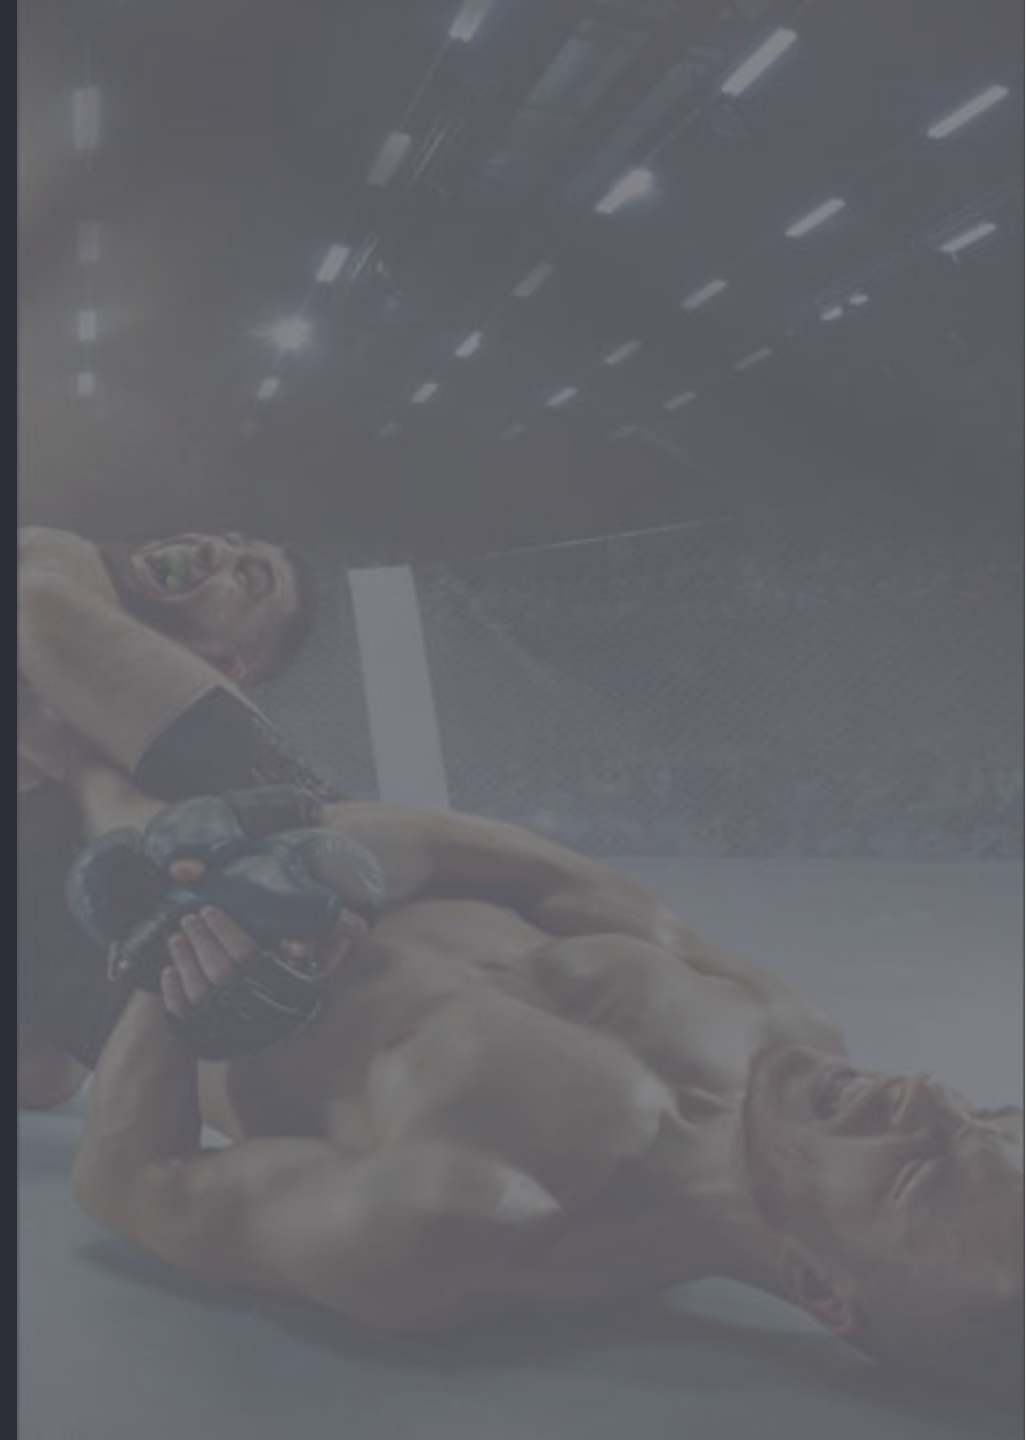

Mission & Purpose

Step into the cage! \$MMA is the FIRST cryptocurrency for the Entire MMA Community. A deflationary cryptocurrency on the Binance Smart Chain (BSC), our goal is to bring the combat sport community into the crypto world and ultimately transform \$MMA into a form of payment for the industry.

Our mascot, the ferocious Honeybadger, represents who we are at our core: fearless, feisty, resourceful and unwavering! With our dedicated team, advanced tokenomics, partnership with Rocket Bunny and fighter influencer endorsements, we plan to conquer the challenge and transform concept into reality. In addition to our own merch site, and with the help of the Community, we will work to get \$MMA accepted for the following items, venues and websites:

- MMA fight tickets
- Boxing tickets
- Combat tournaments
- Fight sport merch websites
- NFT markets
- and others

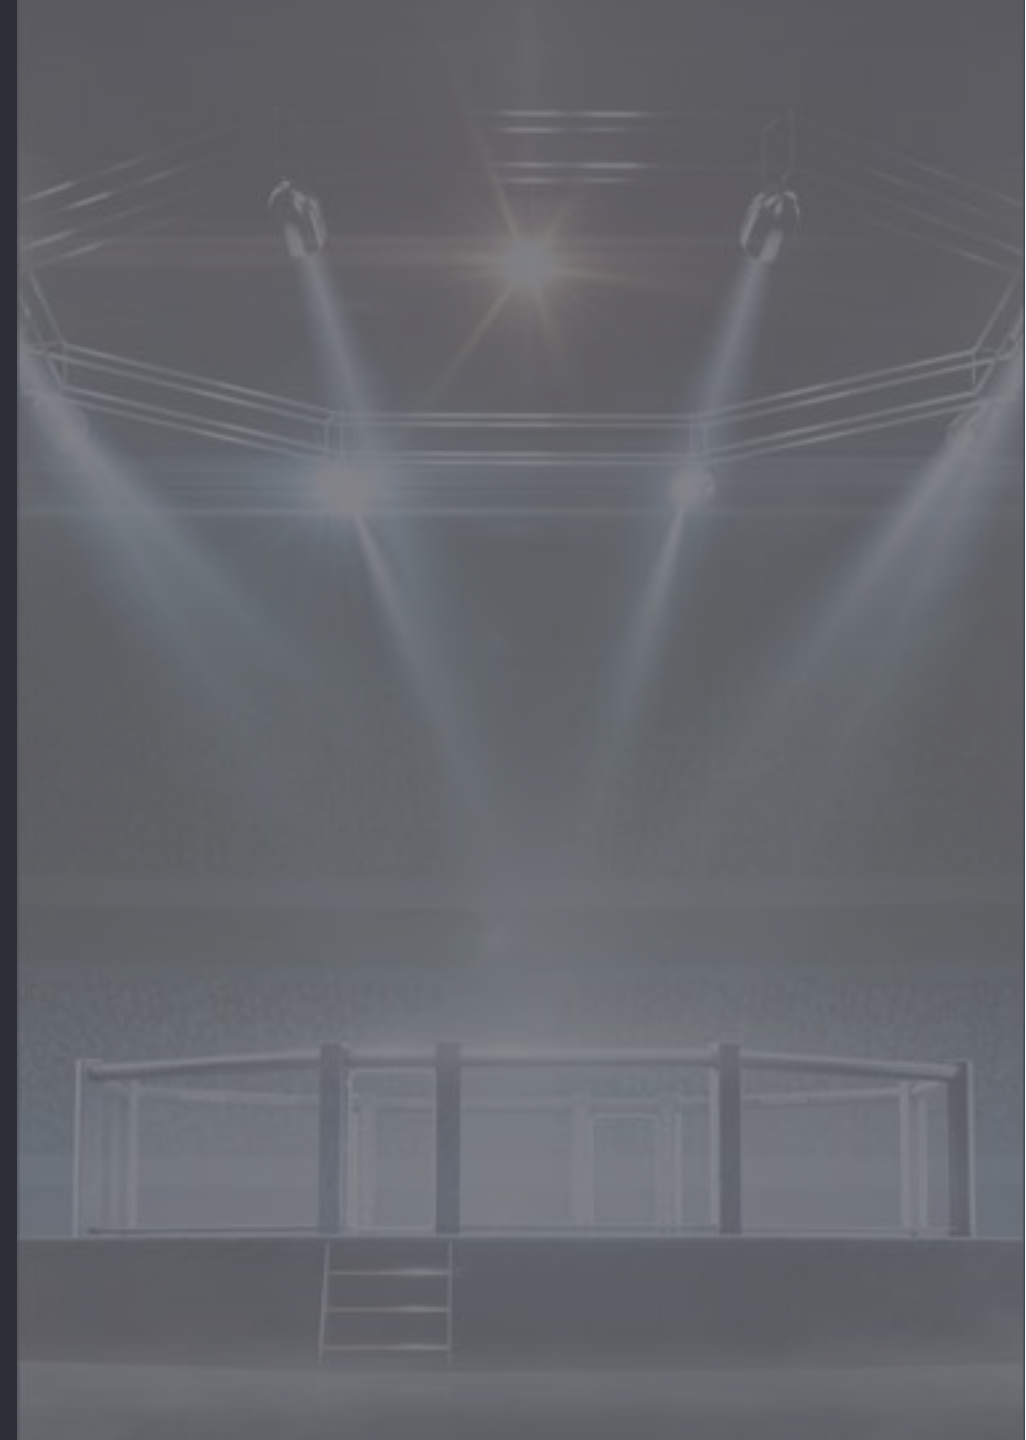

Why MMACOIN?

We believe in our purpose, our plan and our team and here's why; our goals and our values are centered around serving the combat sport community, supporting the MMA industry and giving back to children in need. If these values appeal to you, here are the reasons you should become a part of #TeamMMACOIN:

- **Charity** is our first and most important focus. We will regularly donate to a variety of children's charities from our ever-growing charity wallet with an emphasis on combat sports and children's health.
- **We will help** fighters create, mint and sell their very own NFTs, which are quickly becoming a valuable part of competitive sports and entertainment.
- **\$MMA will serve** as a cryptocurrency, allowing for payment of combat sport goods and services at participating merchants. \$MMA has the flexibility to reduce merchant transaction fees to lower than typical credit card fees, while still contributing to charity with every transaction.
- **Investing in \$MMA** will provide passive income and rewards to \$MMA holders, and who doesn't like passive income?

All of this, combined with an onboarding team for merchant accounts and dedicated community supporters, will allow for exponential adoption, growth and market dominance.

Tokenomics & Distribution

Overview

The token supply for \$MMA at minting is 10,000,000,000 (ten billion), with a portion of these tokens set aside for our team, who are working hard to make \$MMA a success. Team tokens will have staggered vesting periods with multi-sig protection to help mitigate the large token dumps that plague so many cryptocurrencies. The vesting periods are between 3 and 12 months. Everyone on the team has been vetted and has a vested interest in the long-term success of MMACOIN.

Tokenomics & Distribution

MMACOIN Details

- **Initial Burn:** There will be no initial burn with \$MMA as this actually does nothing of relevance. We believe that 10 billion is the “sweet spot” for the \$MMA token.
- **Auto liquidity lock:** 1% per transaction with all of the supply added to liquidity and locked for life which helps to promote token price sustainability.
- **Ongoing Burn:** 1% burned on transactions, decreasing the supply (deflation).
- **Charity:** 1% per transaction goes into the charity wallet, to be distributed to children’s charities in an open and transparent way.
- **Transaction Tax Redistribution:** 1% redistributed proportionally to \$MMA holders’ wallets via frictionless yield on transactions of \$MMA. Simply hold your \$MMA and earn more \$MMA (passive income).
- **Farming on Rocket Drop (Rocket Bunny Ecosystem):** 5% of the minted tokens will be available for rewards (via staking \$PBOM) during the first two weeks of launch with liquidity providers receiving the highest rewards and any remaining tokens immediately burned.
- **Ongoing Success Wallet:** 1.5% is sent to a wallet to fund branding, marketing, communications, CEX listings, integrations, promotional giveaways, influencers, fighter sponsorships, and more.
- **Whale Control:** You will be considered a whale if you reach 0.25% of the total outstanding coins and will only be able to sell 20% of your holdings per transaction.
- **DEX:** \$MMA will launch exclusively on Pocket Swap due to the ease and benefits associated with the Rocket Bunny Ecosystem, like leveraged liquidity, outstanding customer support, a user-friendly interface, and whitelisting of \$MMA (no need to add \$MMA address, import token, set slippage, etc.). Simply connect your wallet to Pocket Swap, choose \$MMA, your quantity, then swap!

Tokenomics & Distribution

What Sets Us Apart

One of the most exciting and important aspects of \$MMA is our charitable donations. As more people transact with \$MMA, our charity wallet will increase, and we'll be able to help more and more kids around the globe. Donations from our charity wallet will be made on a regular basis to vetted children's charities, especially those with a focus on combat sports, and we will always be totally transparent about the amount of money we have raised, the amount donated, and who we have donated to. MMACOIN is developing a formalized process to allow charities to apply for funding. Additionally, each sponsored fighter will have the opportunity to choose a charity that they are passionate about for a one-time donation.

Another aspect of MMACOIN that sets us apart is our "Ongoing Success Wallet." We all know one of the reasons that so many coins/tokens fail because they ask the community for funding for branding, marketing, communications, and more. This is unsustainable and we won't be one of those tokens. With this setup, everyone has skin in the fight.

Our whale and bot control are also totally exceptional. We all know whales can destroy a good project and that's not what we want to do. Aside from the protections mentioned above, we're using code enabled to help control whale formation at launch. In short, for the first 24 hours, you will only be able to purchase 4 \$BNB worth of \$MMA. As for bot protections, let's just say we have a few things in store for any bots trying to front-run \$MMA buyers.

- **Initial Supply:** 1,000,000,000,000,000 (one quadrillion)
- **Circulating Supply:** There will be no circulating supply, meaning, \$MMARewards will not trade. It will strictly be utilized for periodic airdrops to holders. Holders of \$MMARewards will be able to utilize their reward tokens on the MMACOIN merchandise site in the future. After \$MMARewards are utilized, they are then burned for life.

Where We Are & Where We're Going

MMACOIN Roadmap

We're just at the beginning of this journey and we want you to know we plan to go three rounds in these initial stages. Here's just a bit of what we're planning as we fight to become a top contender in cryptocurrency.

Where We Are & Where We're Going

Roadmap Phases

Round 1

- Marketing Start
- First sponsored fighter announcement
- Staking/Farming on Rocket Drop
- Launch on Pocket Swap
- Coin Gecko, Coin Market Cap (CMC) Submission
- Poooin.app setup
- Fighter NFT creation and minting
- First charity identified, vetted and donation made
- Kick-off audit

Round 2

- Marketing Accelerated
- Second sponsored fighter announcement
- Blockfolio submission
- Merch store development
- Website enhancements V2
- CEX Listing
- More fighter NFT creation and minting
- More charitable donations
- MMACOIN promotions kickoff

Round 3

- Marketing Blast
- Third sponsored fighter announcement
- Website enhancements and merch store launch
- More fighter NFT creation and minting
- More charitable donations
- Begin mobile app development
- Promotional giveaway via \$MMARewards airdrop

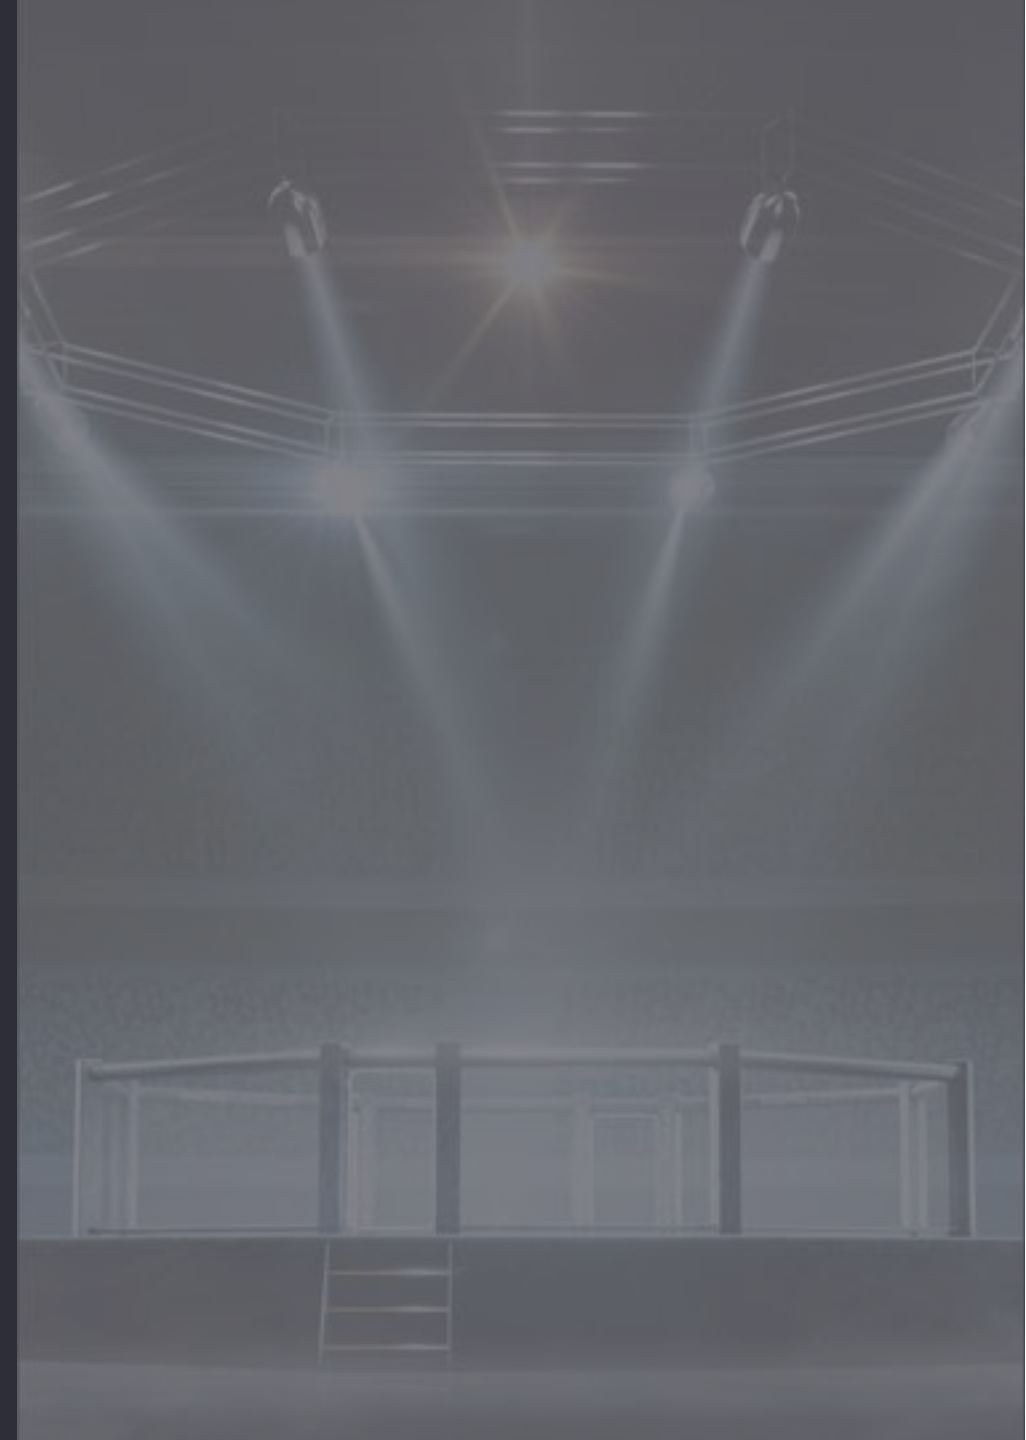

This is just a small sample of what we have in store for \$MMA as we grow and build.

Ready To Step Into The Cage?

MMA COIN is a totally unique, principled and determined endeavor, ready to take the crypto industry to the next level and do good for the combat sport industry and the world at large. We have built \$MMA to be a safe and secure cryptocurrency with built in protections, transparency and an eye for something bigger as we aim for the stars. The moon is just too close.
